DESCRIPTION: AC-DC POWER SUPPLY **SERIES:** VMS-100C

FEATURES

- universal input voltage (85 ~ 264 Vac)
- wide operating temperature (-40 to +85C)
- active power factor correction
- certified to 60601, 60335, and 61558 safety standards
- suitable for safety class I or class II installations
- over voltage, over current, over temperature, and short circuit protections
- adjustable output via trim POT
- low leakage current (< 0.1 mA)
- low standby power consumption (0.5 W)

Notes:

- 1. When the output voltage is increased, the total output power cannot exceed the nominal output power.
- 2. If the total output power exceeds the nominal output power, it can be maintained for a maximum of 10 seconds, but not repeated for at least 30 minutes. The power supply cannot exceed the transient power.
- 3. At full load, nominal input, 20 MHz bandwidth oscilloscope, tip & barrel method, output terminated with 47 µF electrolytic and 0.1 µF ceramic capacitors. Under light load conditions (<15%) the measurement may double in an effort to maximize converter efficiency.
- 4. At 230 Vac.

1. The power supply is considered a component of the end system. All EMC performance has been tested on a metal plate with the dimensions 360 x 360 x 1 mm. The power supply must be integrated into the end system for proper electromagnetic compatibility testing.
