Notes:

1. Maximum output power is 280 W with 18 CFM forced air cooling. For open frame models, the maximum output power is 210 W with natural convection, for U-frame models 200 W with natural convection.
2. With forced air (18 CFM).
3. Ripple is measured with 20 MHz bandwidth and 47 µF tantalum capacitor in parallel with a 0.1 µF capacitor at output connector.
4. At 230 Vac, full load.
5. All specifications are measured at Ta=25°C, nominal input voltage, and rated output load unless otherwise specified.
